CARE AND MAINTENANCE LEATHER

Varieties of materials are used in construction of "Recliner" furniture range, Such as Stainless Steel; Nickel plated steel; Chrome plated steel; Powder coated steel; Timber, Leather, PU synthetic fabric & a variety fabrics.

All will require some form of maintenance to extend the life of finishes and general appearance. Please see below instruction unique to your chosen model.

Leather Covering;

Keep dust free at all times.

Regular use a damp soft clean cloth and wipe down leather.

Pay special attention to areas where skin touchers leather. IE: Armrest Pads, Headrest, front section of chair and footrest tops.

Please clean up spills immediately. Ensure to dry properly before use.

Periodic Leather Cleaning;

Every 3-4 months you need to give leather a good clean to remove excess body oils. Please purchase a propriety leather cleaner and follow all directions indicated on packaging. You could also purchase a leather conditioner/protector to complement the leather after a good clean.

Frequency of periodic cleaning can vary due to colour of leather, use and environment. A chair used 2 hours a day will require less cleaning than a chair used 8 hours a day. Areas of high humidity will require more cleaning than areas of low humidity.

Professional Cleaning;

Even the most diligent house keeper cannot always prevent leather from aging or looking tired. We recommend you use the services of a reputable leather cleaning service when your cleaning does not appear to make a difference in appearance.

Things to know about leather;

The surface of leather can be affected by chemicals used in hair spray, gel, mousse, perfume, deodorants, some medications, alcohol and dye transference from clothing. Please factor this into your cleaning regime.
